- TimeManagement
- Work With Individual &Group

### ■ INTEREST IN

- Interest to Work in Progress
- Badminton
- Fitness Activities
- Traveling
- Making Different Responsive and animated Websites

### ■ LANGUAGES

English  
Hindi  
Odia

## SELF INITIATIVE PROJECTS

---

### ■ Tourism Management System

- This website embodies the essence of the Odisha Tourism System, featuring full responsiveness. It comprehensively showcases all the tourist destinations across Odisha.
- Technologies utilized in its development include React, Bootstrap, JavaScript, and React-Bootstrap.
- URL:- <https://nigammishra.github.io/tourism-management-system/>

### ■ Library Management System

- It's a full-stack project where admins manage CRUD operations. Data is stored locally, with login and registration data sourced from session storage. Technologies utilized in its development include React, Bootstrap, JavaScript, and React-Bootstrap.
- URL:-<https://frex-arup.github.io/library-mgmt-react/>

### ■ Grocery Shop

- This self-initiated project is a fully responsive website, similar to any online grocery store. The primary language used is React.js, with additional technologies including HTML, CSS, Bootstrap, React-Bootstrap, and JavaScript.
- URL: - <https://nigammishra.github.io/Grocery-react/>

### ■ Easy Shop

- It is a fully responsive front-end design for a shopping website featuring a wide variety of items, similar to Flipkart and Amazon.
- I provide free responsive templates and frontend designs for various stores, including Single Product/Brand Store, Fashion Store v.1 and v.2, Grocery Store, Multi-vendor Marketplace, Food Delivery Service, Electronics Store, and NFT Marketplace.
- URL: - <https://nigammishra.github.io/EasyShop/>

### ■ Employee Management System

- This React project uses a JSON server as the backend and database, enabling CRUD operations via the server's base URL. The frontend is built with React.js and Bootstrap, supporting API integration for GET and POST methods to retrieve and submit data.
- URL: - <https://github.com/nigammishra/employee-management-systemm.git>

### ■ Artificial Intelligence

- This static project, comprising approximately 120 web pages, provides comprehensive information about artificial intelligence, including its benefits, drawbacks, and merits. The project is built using HTML, CSS, and JavaScript.
- URL: - <https://github.com/nigammishra/Artificial-intelligence.git>

### ■ Contact Book

- This React project uses a JSON server as the backend and database, enabling CRUD operations via the server's base URL. The frontend is built with React.js and Bootstrap, supporting API integration for GET and POST methods to retrieve and submit data
- URL: - <https://github.com/nigammishra/Artificial-intelligence.git>

## FIGMA DESIGNS

---

### ■ My Portfolio

- Portfolio Home page Figma prototype
- URL:- <https://www.figma.com/design/irfNldS6du2cy4fPq749rw/Portfolio-Home-Page?node-id=0-1&t=eU7MwSLHolQYpejX-0>

### ■ Car Search

- The ongoing project involves designing a Figma prototype for the Car Search application.
- URL:-<https://www.figma.com/design/aVfRzmqHfcCuhr0Y1vaZJt/CAR-Search?t=eU7MwSLHolQYpejX-0>

### Grocery Shop

- Grocery Shop Home page Figma prototype
- URL:-<https://www.figma.com/design/DFJWxCmuRctbZQTyTZIGhJ/Grocery-shop?t=eU7MwSLHolQYpejX-0>
